

Aluminum Welding Wire

FEED YOUR MACHINE

NS ARC™ Alumi Glide® aluminum welding wire is a highly versatile filler metal that offers distinct advantages for a wide range of applications. With its superior strength-to-weight ratio, corrosion resistance, and excellent conductivity properties, Alumi Glide® is the go-to choice for projects where strength, ductility, and weight savings are paramount.

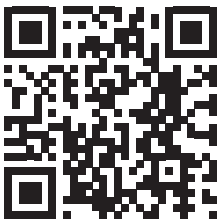

BENEFITS

- Lightweight
- High strength-to-weight ratio
- Corrosion resistance
- Ductility
- Versatility

APPLICATIONS

- Agricultural Equipment
- Auto Body
- Automotive Exhaust
- General Fabrication
- Heavy Equipment
- Pipe Welding
- Pressure Vessels
- Railcars
- Shipbuilding
- Structures
- Trailers
