

## Flux-Cored Welding Wire

### FEED YOUR MACHINE

NS ARC™ Tru-Core® FC flux-cored welding wire is the ultimate solution for convenient and versatile welding. With its unique composition, this consumable electrode provides exceptional protection against atmospheric contaminants and oxidation to ensure weld stability and control, even in challenging environments. Suitable for various welding positions, including vertical and overhead, it empowers welders to achieve outstanding results with increased efficiency, improved weld quality, and streamlined operations.

### BENEFITS

- Increased Efficiency
- Improved Weld Quality
- Versatility
- Reduced Equipment Requirements
- Reduced Pre-Weld Preparation
- Reduced Risk of Porosity

### APPLICATIONS

- Agricultural Equipment
- Heavy Equipment
- General Fabrication
- Pipe Welding
- Pressure Vessels
- Structural Steel
- Trailers
